SCOTT COUNTY WATERSHED

History

In 1990, 1993 & 1995 severe flooding occurred on Scott County urban streams. This flooding was a result of the conventional methods being used to deal with stormwater. These events and concerns with water quality in Scott County streams led to the formation of the Partners of Scott County Watersheds, an alliance committed to *developing and implementing ways all citizens can be better stewards of our watersheds.*

Since 1995, the group has been improving water quality in Scott County by providing residents, landowners, developers, environmental organizations, educators, and government officials with education, technical support, and financial assistance to promote and install best management practices.
