Quality Care For Kids

A newsletter for Scott County Child Care Providers

EBRUARY 2015

February is Children's Dental Health Month. Developing good habits at an early age and regular dental visits helps children to get a good start on a lifetime of healthy teeth and gums. Iowa's I-Smile™ recommends these helpful activities:

- Before baby's teeth erupt, wipe their gums with a clean wet washcloth at least once a day.
- 2. Once teeth erupt, brush them with a soft infant-

Inclusive Care

sized toothbrush at least once a day.

Children's Dental Health Month

- Children should brush their teeth for 2 minutes twice a day.
- 4. Use a pea-sized amount of fluoride toothpaste for children 2 years of age and older.
- 5. Children should floss their teeth (with a parents help) daily.
- 6. Provide healthy snacks like fruits, vegetables,

7. Avoid sugary snacks and

to mealtimes.

cheese and yogurt.

8. If needed use a pacifier for helping babies get to sleep.

limit sugar and starches

- 9. Wean babies from the bottle by 1 year of age.
- 10. Start regular dental checkups at 1 year of age.

I- Smile™

I-Smile[™] can link families to local dentists and offer dental education for kids. To learn more, contact I-Smile[™] Coordinator Sarah Borsdorf, at (563) 326-8645.

Interested in tooth brushing? Guidance for implementing a tooth brushing program in child care, including supplies and storage, is available. Call Jessica Redden at (563) 326-8618 Ext. 8821.

Call your Child Care Nurse Consultant if you have any questions about child health and safety, or any special training needs.

The Americans with Disabilities Act (ADA) provides comprehensive civil rights protections for individuals with disabilities. Title III of the ADA applies to child care providers including centers and child development homes.

All children benefit from inclusive care because children learn from each other, they share in each others experiences, they feel a sense of belonging, and they develop an acceptance of each other.

Communication, planning and coordination of care is important so that staff are educated and feel confident in safely caring for the child with special needs and parents feel confident in the care that is being provided for their child.

Evaluating program policies and practices; making accommodations; and working as a team (provider, parent, physician, child care nurse consultant, etc.) for care planning is important for successful inclusive care.

For more information on inclusive care contact your local child care nurse consultant. For more information on the ADA and child care go to:
