SCOTT COUNTY ZONING BOARD OF ADJUSTMENT AGENDA

Wednesday, January 24, 2024 4:00 P.M.

- 1. Call to Order
- 2. Attendance
- 3. <u>Election of 2024 Officers:</u> Election of Chair and Vice-Chair for the 2024 Scott County Zoning Board of Adjustment
- 4. Approval of Minutes: Approval of the December 20, 2023 meeting minutes.
- 5. <u>Public Hearing Variance:</u> Request from Alan Carter to allow the construction of a 45' X 30' accessory building to proceed, with a 0' setback from a side property line in lieu of the 10 feet (10') prescribed in the Zoning Ordinance, at the property address 6200 115th Street, legally described as Lot 20 of Village Oaks in Section 18 of Buffalo Township (Parcel #721817120).
- 6. Old Business
- 7. Zoning Administrator's Report
- 8. Public Comment
- 9. Adjournment

Public Hearing Procedure:

- Chairman reads notice of public hearing.
- b. Director reviews case.
- c. Applicant/Representative speaks on behalf of request.
- d. Public may ask questions or make comments.
- e. Director makes staff recommendation.
- f. Applicant may respond to comments and/or recommendation.
- g. Board members may ask questions.
- h. Chairman closes the public portion of the hearing. (No more comments from public or applicant.)
- i. Discussion period to determine justification for decision.
- j. Board members move to accept, reject, or modify request.
- k. Final vote. Case closed. Three members of the Board constitute a quorum. The concurring vote of <u>three</u> members of the Board shall be necessary to reverse any decision or determination of the zoning administrator or to decide in favor of an application for a variance or conditions for a special use permit. The Board of Adjustment is "quasi-judicial" and not a recommending body. Therefore, any appeals to their decisions should be filed with District Court within 30 days of the meeting.

600 West Fourth Street Davenport, Iowa 52801-1106

SCOTT COUNTY ZONING BOARD OF ADJUSTMENT NOTICE OF PUBLIC HEARING

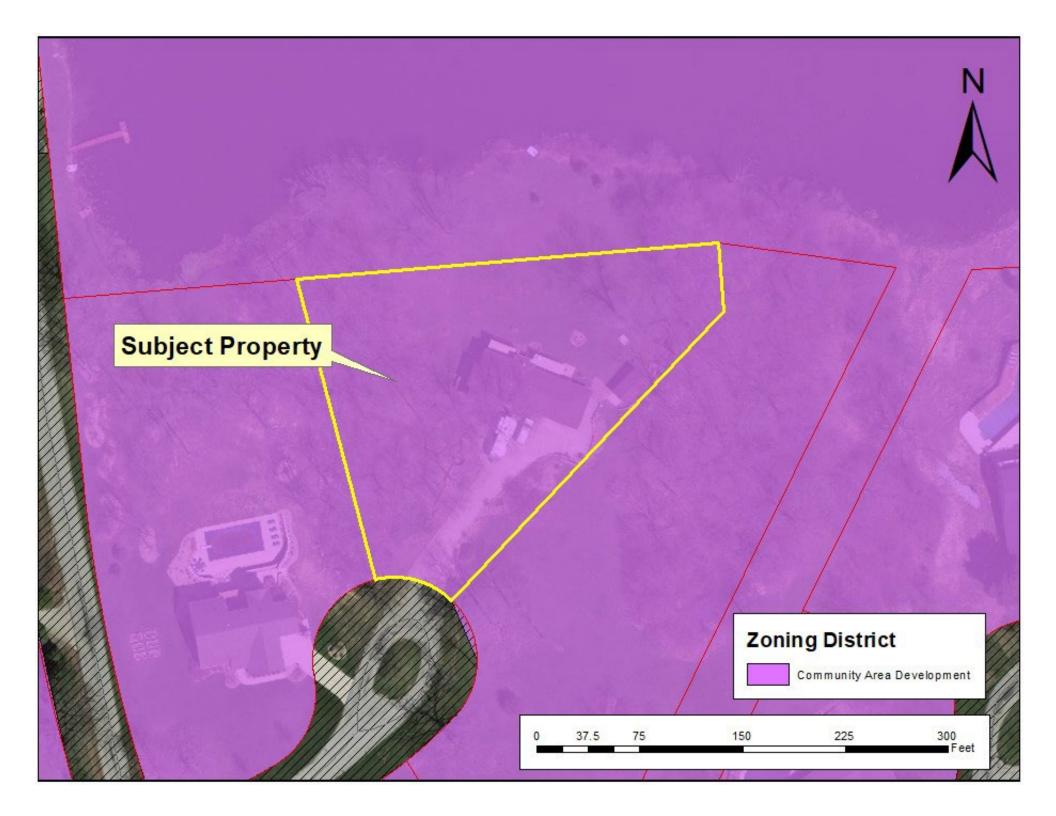

Notice is hereby given that the Scott County Planning and Development Department has on file the following application as allowed by the Scott County Zoning Ordinance. In accordance with Section 6-30, this Notice is being sent to all property owners of record within 500 feet of the area in question and to appropriate County officials to notify all of a public hearing to be held in the 1st Floor Board Room, County Administrative Center, 600 W 4th Street, Davenport, IA, 52801 on Wednesday, January 24, 2024 at 4:00 P.M.

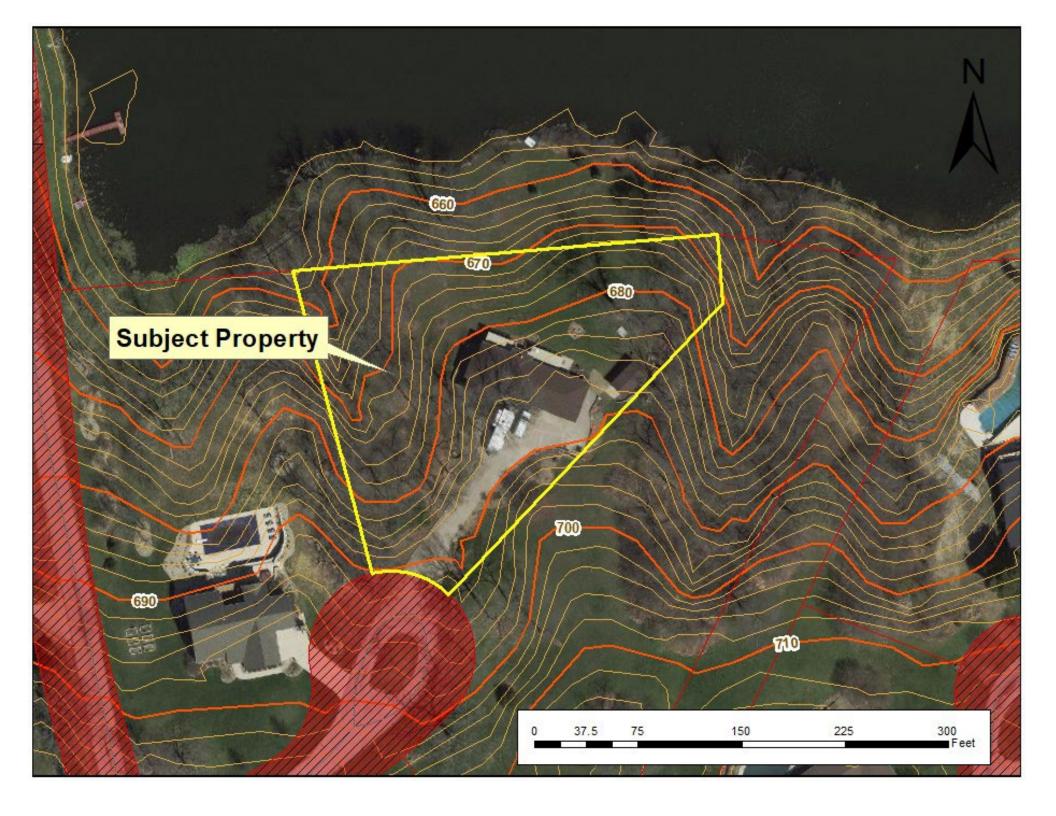

The Zoning Board of Adjustment will hear the request of **Alan Carter** to allow the construction of a 45' X 30' accessory building to proceed, with a 0' setback from a side property line in lieu of the 10 feet (10') prescribed in the Zoning Ordinance, at the property address 6200 115th Street, legally described as Lot 20 of Village Oaks in Section 18 of Buffalo Township (Parcel #721817120). The applicant cites the lot topography as the hardship warranting approval of the variance.

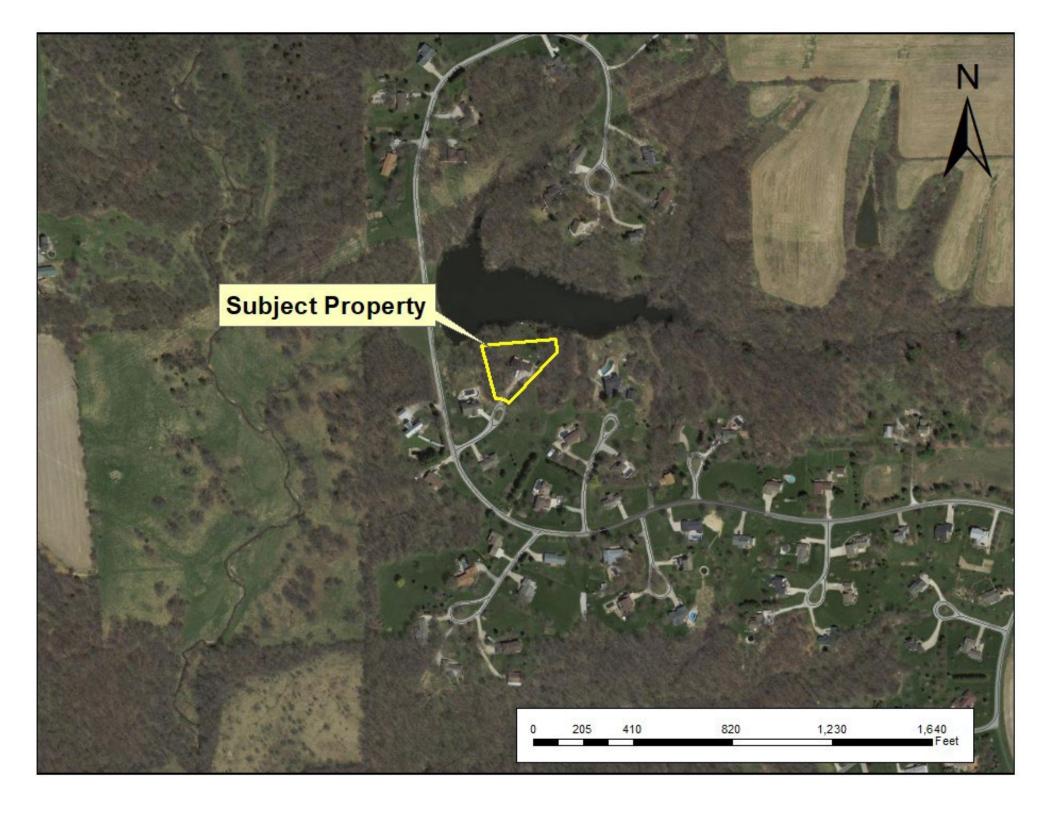

If you have questions or comments regarding this meeting or the requested variances please call, write or email the Planning and Development Department, 600 West Fourth Street, Davenport, Iowa 52801, (563) 326-8643, planning@scottcountyiowa.gov or attend the meeting.

Village Oaks Homeowner's Association Architectural Design Committee

Your plan dated 12-1-23, drawn by ALAN CARTER (has) (has not) been approved subject to the site plan submitted for Lot 20, Village Oaks, with the following conditions:
The home/home improvement located and constructed on the lot will be built as shown on the plans submitted and will be constructed in accordance with existing Scott County building codes and further restrictions and requirements of the Village Oaks Homeowners Association as shown in the protective covenants dated October 25, 1975 and filed on November 26, 1975, DOC# 18727-75.
In order to protect our roadways, no concrete or material delivery trucks will drive on Village Oaks roadways with any axel weight of more than 6 tons. Concrete trucks will not be allowed to park or wait on any Village Oaks roadways while the mixer drums are rotating. All mixer drum clean out will be done on the lot where the concrete is being delivered or outside of the Village Oaks subdivision.
All construction sites will be picked up daily so that refuse will not be allowed to blow around the Village Oaks subdivision area.
Under Article 5, Section 4 of the Village Oaks Protective Covenants, any and all improvements shall be constructed within the following guidelines: 1) 50 feet from the front lot line 2) 40 feet from the rear lot line 3) 35 feet from the side lines
If due to the contour of any lot, these requirements cannot be made, the design committee shall have the power to waive these restrictions with full consideration to those adjacent lots.
This agreement has been read and approved by the homeowners, builder/Contractor, and the Village Oaks Architectural Design Committee.

Included with this letter are initial drawings of garage showing the bottom 3 ft perimeter plans to construct an apron, chair rail of brick or stone veneer to closely match the brick on front of house. Further plans to match garage to appearance of house consist of matching color of metal siding on my home to the color of metal siding on garage. We ask the HOA Village Oaks for approval on this plan to satisfy covenant rules within Village Oaks HOA.

Accessory Building

Subject: Garage Construction / Lot Line -East 6200 115 th St Blue Grass, IA 52726 Lot # 20 Parcel # 721817120

Village Oaks Association Easement Rules at Front/ Side/ Rear of properties

Front Line: 50 ft - distance is over 200 ft from lot line

Rear Line: 40 ft- distance is 50 ft / over 100 ft to lake shoreline

Side Line : 35 ft - distance is 15 ft (this distance was originally closer to the

permitted distance, (building was to set 8' to rear) but felt moving building south towards front for proper compaction of dirt and strength in tier retaining wall

It is understood that both parties involved, Alan Carter (East property line) and Ray Carter (West property line) are in agreement and if needed, this letter serves as written permission to construct building closer to side property line than the requirement of HOA distance of 35 feet.

Furthermore, Alan Carter has permission to use an agreed amount of dirt for use of leveling ground work in construction of building, and have a private agreement that landscaping will be completed and tastefully done, with drain tiling / drainage rock properly installed and terminated.

We ask the Village Oaks Homeowners Association for consideration in this variance, it is believed to be an improvement in value and appearance to the neighborhood.

Re:

- Permit Application

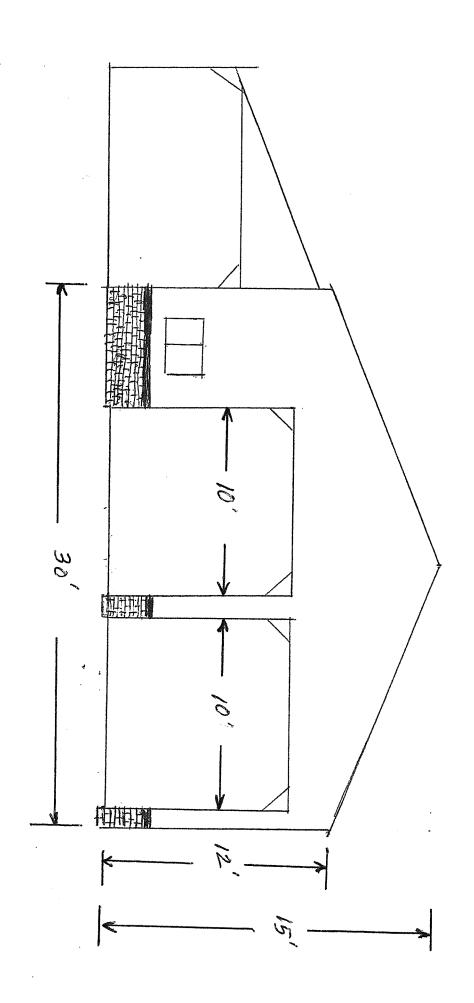

- Permission to finish construction / Garage placement - Easement

April 2023; purchased an Olympia Steel Building w/ Steel Beams, 30x45 that original buyer ordered, but could not pay for / pick up. Original cost \$ 43,500. I was able to buy this quality fireproof new building for \$ 22,000. delivered.

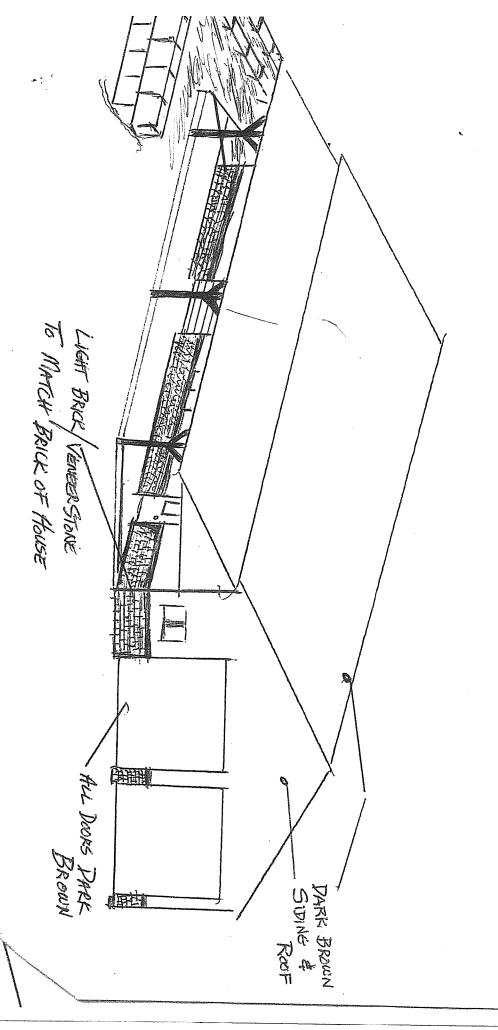

I met with Ray Carter , discussed the building project and layout on my lot (Alan Carter) which is the East side of house on pie shaped property next to the deep ravine covered with timber. Plan was to encompass the north end of building with two four ft high wall tiers made from 2'x2'x4' - 2000 lb textured retaining block = 100 blocks. 18"w x 48"h of drainage rock , felt & 4" perforated tile for drainage directly behind walls and fibered grid to interlock blocks. We were in agreement with site plan , subsequently signing a letter to the fact. Being on a Hillside , needed to fill in / compact down dirt as it is filled . With 8' of fill needed to level. I felt spacing the tier walls farther apart was crucial for stability. Repeating same procedure on another wall uphill.

With the weight of blocks also , i believed spacing the garage South toward more shallow compacted dirt (over natural dirt) would be important to eliminate settling. Upon meeting again with neighbor Ray Carter, explaining plan to situate building up close to our Lot Line, showing where it would come out to , he had stated was surely ok with him that it looked to be within line next to deep ravine . He kindly offered to use some of his dirt to move down to help with the fill to level . We had agreed on positioning and believed were within lot lines. Also thought would be ok with HOA Officer across the street with a House constructed of Steel Building design , also just constructed a very similar Garage Steel Building at Lot# 17 across street. With the actual Village Oaks Easement for Lake access running down the opposite side of ravine & timber on next property over at East side of Ray Carter's lot , I started the construction of floating slab with 20"x24" concrete (2500psi) perimeter footing / 5" slab. constructed with Double 1/2" rebar on chairs , 8'x12' raised mesh overlapped / tied .

BUILDING SPECIFICATIONS

The manufacturer is not responsible for the concrete foundation design. The structure under this contract has been designed and detailed for the loads and conditions stipulated in the contract and shown on these drawings. Any alterations to the structural system or removal of any component parts, or the addition of other construction materials or loads must be done under the advice and direction of a registered architect, civil or structural engineer. The manufacturer will assume no responsibility for any loads not indicated.

This manufactured building is designed with the manufacturer's standard design practices which are based on pertinent procedures and recommendations of the following organizations and codes:

-American Institute of Steel Construction "Specification for the design frabrication and erection of structural steel for buildings."

-American Iron and Steel Institute "Specification for the design of cold formed steel structural members" 2007 edition.

-Metal Building Manufacturers Association "Specification for the design fabrication and erection of the structural system" most current edition. Material properties of steel plate and sheet used in fabrication of primary rigid frames and all primary structural framing members (other than minimum yield point of 55 KSI.

Material properties of cold formed light gage steel members conform to the requirements of ASTM A-653, with a minimum yield point of 55 KSI High strength bolts and their installation shall conform to ASTM specification A-325 and are designed as bearing type connections with threads included in the shear plane. All high strength bolts are to be installed to the "Snug-Tight" condition as defined by the RCSC Specification for Structural Joints Using A325 or A490 Bolts, Latest Edition, section 8.1, unless noted otherwise. Bolts in standard holes do not require washers per section 6.

Shop and field inspections and associated fees are the responsibility of the contractor, unless stipulated otherwise.

CONTRACTOR RESPONSIBILITIES
The contractor must secure all required approvals and permits from the appropriate agency as required.
Approval of the manufacturer's drawings and calculations indicate that the manufacturer has correctly interpreted and applied the requirements of the cantract drawings and specifications. (AISC 303-10 Code of Standard Practice)

Where discrepancies exist between the manufacturer's structural steel plans and the plans for other trades, the structural steel plans shall govern.

(Section 3.3 AISC 303-10 Code of Standard Practice)

Design considerations of any materials in the structure which are not furnished by the manufacturer, are the responsibility of the contractor and engineers other than the manufacturer's engineering, unless specifically indicated. The contractor is responsible for all erection of steel and associated work in compliance with the manufacturer's "For Construction" drawings.

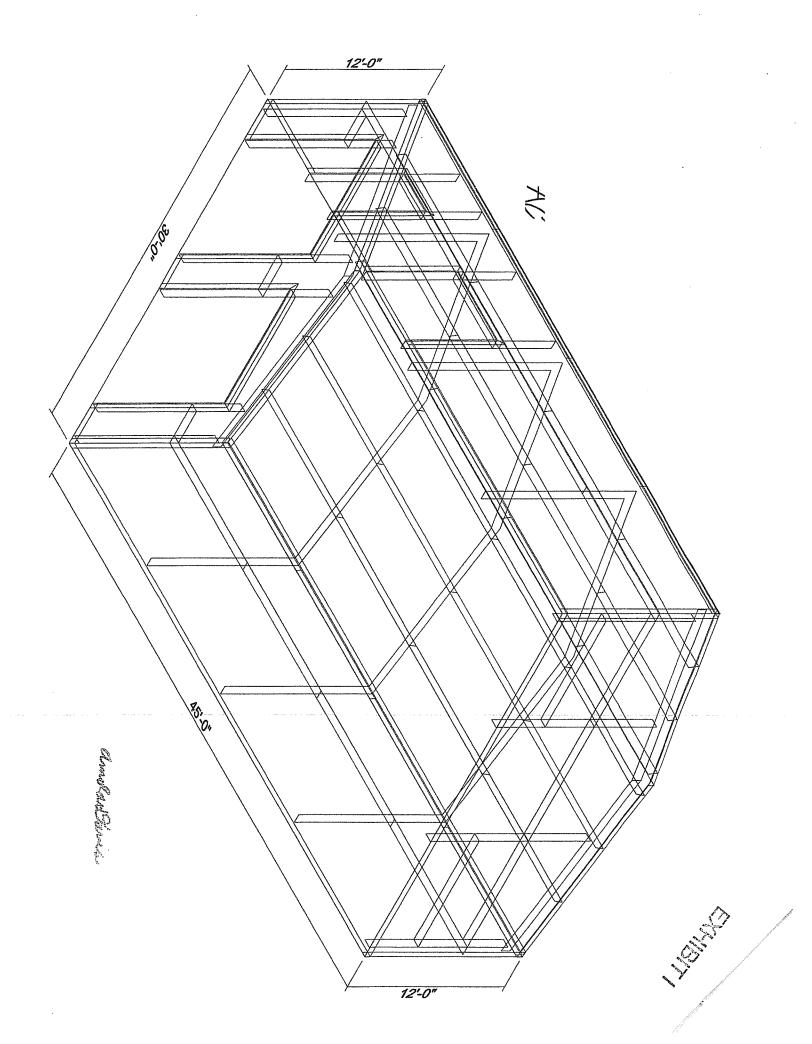

Temporary supports, such as guys, braces, flashwork or other elements required for the erection will be determined and furnished and installed by the erector. (Section 7 AISC 303—10 Code of Standard Practice)

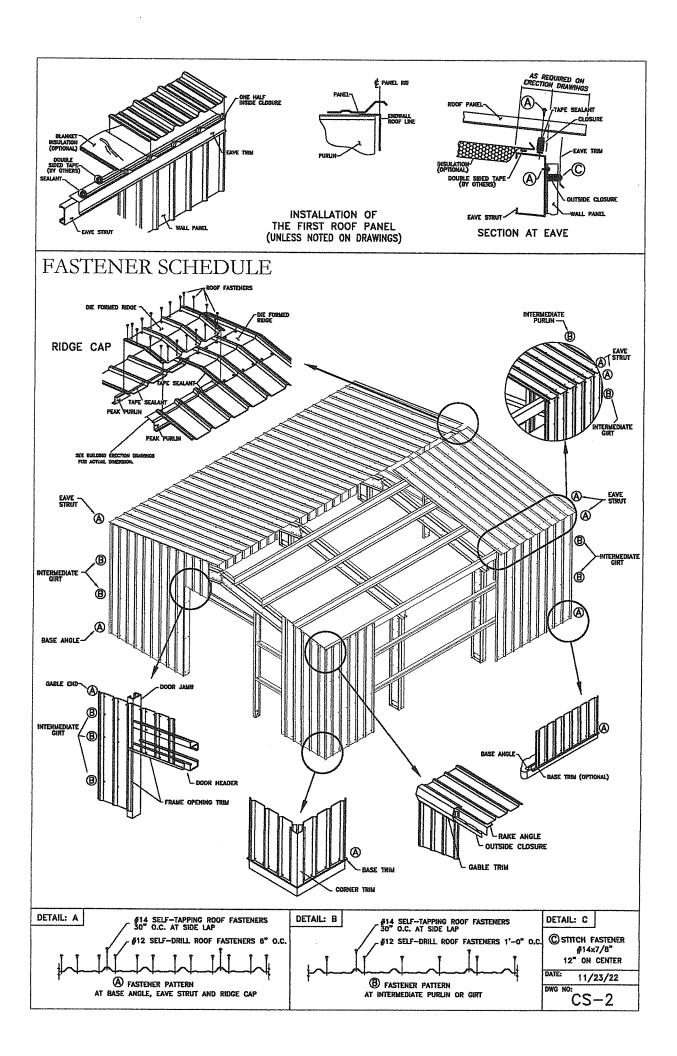

It is the contractors responsibility to apply or observe all pertinent safety rules and regulations, as per OSHA standards as applicable.

The Contractor is responsible for the verification of all shipments received. Any "external" damage or shortages must be noted on all capies of the bill of lading and one copy is to be retained for your records. Failure to do so will make it impossible for the factory to honor any claim. NO EXCEPTIONS!!!
